TO-MORROW,

Sunday, July 31. THE SUNDAY WORLD to-morrow will richly reward those prudent citizens who. without waiting for breakfast, burry out and swiftly bear down upon their news-It will delight the high-minded voter who always has the greatest Sunday paper delivered at his door and who wakes his wife up by waving the Woman's Page around her head, thus keeping her good natured all day. It will delight the pinster, giving her good advice and supplying occupation far more useful than running around after a husband who might have turned out a failure. It will make the city man forget the delights of the country and keep the happy seaside fellow fully informed of the doings of the miserable worm in town. It will make the strong man rejoice in his strength. very much after the style of the behemoth, and it will cheer up the invalid by telling hun all about those who got shot drowned or run over throughout the land, and who would have escaped if they had been sick abed. This is a novel by J. M. Barrie, the wonderfully brilliant Scotchman who wrote "A Window in Thrums," "The Little Min-ister," "Better Dead," &c. The World's idea is to give the people what they want, if it is good for them. Therefore, this novel, although it is not a short one, is printed complete in this single number of the paper, and World readers will know all about what happened to Mr. Angus, the hero who could never learn to tell the difference between "I shall" and "1 will," who in a dream saw all the editors arried before him on a stretcher, and in his rage tipped over one stretcher, who finally became an editor himself, and married a girl as fine as any he could hope to and outside of America. Awful Mortality in Williamsburg Sugar Refineries.

Men Working in a Temperature Far Above 100 Degrees.

Nothing is so serious as humor in this land. Therefore, more attention must be Heat—Three Died To-Day. Heat-Three Died To-Day.

Out of the 1,400 employees of the sugar refineries of Williamsburg during the past with the seriousness and thoughtfulness six days of dreadful heat almost five hundred men have been prostrated and fourteen have

succumbed. Notwithstanding the slight rain last night, during the shift at both the Havemeyer and Brooklyn sugar refineries men quit by dozens, refusing to work any more. That portion of the Havemeyer refinery facing on Kent avenue is cleven stories high, and all during the night and early this morning white-faced mon could be seen leaning out of the numerous windows, gasping for a breath of sir. Inside, the temperature ranged from 110
